Forecast for Friday 21 Jun 2024

Weather: Rather cloud by dawn, although it should remain largely dry. Some bright or sunny spells developing, for a time. However, a band of rain, locally heavy, will arrive from the west by late-afternoon and into the evening.

Chance of cloud-free hill tops above 600m: 40%, improving to 90% during the day, reducing to 20% later in the day.

Low cloud and visibility: Cloud obscuring tops above 500m at times through the morning but lifting to around 800m through the morning and early afternoon. Cloud then thickening and lowering to affect most ground above 400 metres by evening. Visibility initially good, but falling to become poor in rain and drizzle with time.

Forecast for Saturday 22 Jun 2024

Weather: Any rain becoming lighter and more intermittent during the early hours, and clearing eastwards around dawn. A largely fine day with some sunny spells follows, bringing a high UV. Cloud increasing again from the west later in the afternoon, becoming extensive down to valley floors on windward ground by dusk, with some light rain or drizzle likely

Maximum wind: Westerly 10-15mph with gusts 20-25mph.

Chance of cloud-free hill tops 600m: 30% at first, rising to 90%. Falling to 20% during the evening.

Low cloud and visibility: Cloud obscuring some tops and routes above 500m first thing, lifting above the summits by mid-morning and into the afternoon. Cloud again lowering to 400m by the evening. Visibility will be poor or very poor in low cloud and drizzle early and late in the day, but generally very good during the daylight hours.

Temperature: **Valleys:** Plus 12 Celsius, becoming Plus 17 Celsius.
At 600m: Plus 7 Celsius, becoming Plus 12 Celsius.
Freezing level: Above the summits.
